

Pi mesh architecture — local LLM UI (Stage 0)

Akash Premkumar · with CTO topology · 2026-09-22

Caption

1. One Meridian instance — pi3 is authority (office + events + HDMI). World viewers later via tunnel (not live yet).
2. Pi PAIR on pi4 — LAN chat UI; Auto spreads inference; Pin forces one bay.
3. Workers — pi4 + pi3: Ollama qwen2.5:0.5b; pi2: llama.cpp tiny GGUF.
4. Fishbowl mesh client — only idle flavor + Docs assist leave the stage when mesh enabled.
5. Heartbeat — dashed to public status.json (CPU/mem only, no addresses).
